Change Request Form

Subject/Title: FBP Slab Counter .neu File Parsing **Version:** v3.6 **CR#:**

System Name: CONDA **Division:** NDA

Requestor: Chris Beard **Date:** 4/17/2018 **Requested Completion Date:** 4/24/2018

Deployment Type: Standard
Standard Monthly Deployment
Emergency (complete Emergency Justification below)

Priority: High
Critical: Legal, compliance, or safety issue.
High: Severe revenue, productivity, customer satisfaction issue.
Medium: Moderate business impact.
Low: All other requirements.

Requires SQA review: Yes ☑

Software Classification: ☑ **Safety-Related** ☐ **Other**

Description:

New MDR Type needs to be parsed into CONDA

Emergency Justification:

N/A

Problem Statement:

Currently there is no parsing feature built in CONDA to handle FBPSC generated MDRs. The Blue Box and LCAS systems utilize this software and generate MDRs from the system. This analyzed data contained within the .neu files generated by FBPSC, will need to be parsed into CONDA. This report is on hold until the files can be parsed and moved through the workflow process in CONDA.

Request - NDA1800228
.neu Files - Sent as a separate email to Craig Patton, John Manasco and Jeremy Travis on 4/17/2018.

Business Impact:

Request is on hold until the data can be parsed into CONDA, allowing the report to continue the workflow process.

Project Goals:

Successfully parse the .neu data into CONDA
