Project Planning Checklist

Section A: General Information	
1. Project Planning Checklist Number	
2. Project Planning Checklist Revision Number	
3. Project Name	
4. Project Contact Name	
5. Project Contact Phone Number	

Section B: Anticipated OSWDF-Bound Waste Streams							
Complete Section B for each anticipated waste stream. Enter information for the first waste stream below, and use Section B Continuation Sheets for the balance of waste streams.							
6. Master Waste Profile Number							
7. Master Waste Profile Revision Number							
8. Waste Type (1 – 5)							
9. Waste Stream Description							
10. Planned Waste Stream Volume	Number		Unit		Conversion Factor		
11. Actual Waste Stream Volume	Number		Unit				
12. Material Source Location Number							
13. Data Group Number(s)							
14. Material Interim Location Number or NA							
15. Methods the project will use to segregate or render compliant OSWDF prohibited materials	a. GWMP Document #		File Name (attach)				
	b. GWMP Section #						
	c. GWMP Page#						
	d. Or Description						
	e. Supplementary Information File Name (attach)						
16. Methods the project will use to meet OSWDF size and form requirements	a. GWMP Section #						
	b. GWMP Page#						
	c. Or Description						
	d. Supplementary Information File Name (attach)						
17. Type of container required for staging or NA							

Section B: Anticipated OSWDF-Bound Waste Streams (Continued)		
18. Type of package required for shipment to the OSWDF		
19. Waste packaging instructions	a. GWMP Section #	
	b. GWMP Page#	
	c. Or Description	
	d. Supplementary Information File Name (attach)	
20. Type of conveyance required for transport to OSWDF		
21. Transportation instructions	a. GWMP Section #	
	b. GWMP Page#	
	c. Or Description	
	d. Supplementary Information File Name (attach)	
	e. Equivalent Level of Safety File Name (attach)	
22. Special Considerations:	a. Safety, health, environment	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	b. Security	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	c. Criticality incredible	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	

Section B: Anticipated OSWDF-Bound Waste Streams (Continued)		
23.	iv. Supplementary Information File Name (attach)	
	v. Criticality Incredible Determination File Name (attach)	
	d. OSWDF Hazards Analysis	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	v. Hazard Analysis File Name (attach)	
	e. OSWDF Performance Assessment	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	v. No Impact Determination File Name (attach)	

Section C: Anticipated Off-Site Waste Streams							
Complete Section C for each waste stream. Enter information for the first waste stream on this form, and use Section C Continuation Sheets for the balance of the waste streams.							
24. Waste stream description							
25. Planned waste stream volume	Number			Units			
26. Container number(s)							
27. Actual waste stream volume	Number			Units			
28. Planned off-site facility							
29. Actual off-site facility							

Section D: Approvals		
30. Project Representative PPC Certification	a. Name	
	b. Signature	
	c. Date	
31. WAO Project Representative PPC Verification	a. Name	
	b. Signature	
	c. Date	

Project Planning Checklist

Section B Continuation Sheet

Project Planning Checklist Number _____

Project Planning Checklist Revision Number _____

Section B: Anticipated OSWDF-Bound Waste Streams							
6. Master Waste Profile Number							
7. Master Waste Profile Revision Number							
8. Waste Type (1 – 5)							
9. Waste Stream Description							
10. Planned Waste Stream Volume	Number		Unit		Conversion Factor		
11. Actual Waste Stream Volume	Number		Unit				
12. Material Source Location Number							
13. Data Group Number(s)							
14. Material Interim Location Number or NA							
15. Methods the project will use to segregate or render compliant OSWDF prohibited materials	a. GWMP Document #		File Name (attach)				
	b. GWMP Section #						
	c. GWMP Page#

	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	b. Security	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	

Section B: Anticipated OSWDF-Bound Waste Streams (Continued)		
	c. Criticality incredible	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	v. Criticality Incredible Determination File Name (attach)	
	d. OSWDF Hazards Analysis	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	v. Hazard Analysis File Name (attach)	
	e. OSWDF Performance Assessment	
	i. GWMP Section #	
	ii. GWMP Page #	
	iii. Or Description	
	iv. Supplementary Information File Name (attach)	
	v. No Impact Determination File Name (attach)	

Project Planning Checklist

Section C Continuation Sheet

Project Planning Checklist Number _____

Project Planning Checklist Revision Number _____

Section C: Anticipated Off-Site Waste Streams						
6. Waste stream description						
7. Planned waste stream volume	Number			Units		
8. Container number						
9. Actual waste stream volume	Number			Units		
10. Planned off-site facility						
11. Actual off-site facility						

Project Planning Checklist

Instructions

The instructions provided below assume that the form is being completed in the WISE database. If necessary, it may be completed manually; however, the preparer would need to obtain information from WAO Program Support and supporting project forms (e.g., MSLs) for information that typically is assigned or populated by WISE.

Section A: General Information

1. Assigned by the WISE database.
2. Assigned by the WISE database.
3. Select the project name from the menu.
4. Select the project contact name from the menu.
5. Select the preferred phone number from the menu.

Section B. Table of Anticipated OSWDF-Bound Waste Streams

Provide the following information for each waste stream.

6. Select a MWP from the menu. If the waste stream does not fit an existing MWP, then complete a MWP form. When the new profile is approved, the MWP number will be available in the menu.
7. Populated by the WISE database from the MWP.
8. Populated by the WISE database from the MWP.
9. Enter a description of the waste stream in text box. The description must fit within the broader description of the selected MWP.
10. Enter numerical value of the planned waste stream volume in data entry field. Select pounds or cubic yards from menu. Enter a conversion factor for pounds in the associated data field that considers the density of the material.
11. Actual waste stream volumes are populated from the OSWDF Tracking Log when waste loads are transferred from the project to the OSWDF.
12. Select the MSL number from menu. **IF** a new MSL is needed, **THEN** complete a MSL form. When the form is processed, the new MSL number will be available in the menu.
13. Populated by the WISE database from the MSL number.
14. Select the MIL from menu or select NA. **IF** a new MIL is needed, **THEN** complete a MIL form. When the form is processed, the new MIL number will be available in the menu. **IF** the waste stream will be staged within the MSL, **THEN** a MIL is not required.
15. **IF** the project has a GWMP, **THEN** attach the GWMP, and enter the applicable Section number(s) and Page number(s) to their respective data fields. **IF** the project does not have a GWMP, THEN enter a Description of the process that will be used to segregate or render compliant OSWDF prohibited materials, to the Description text field. **IF** the GWMP or the Description text field does not contain adequate detail, **THEN** attach supplementary information to the Supplementary Information data field. Note: See WAC IP Table 3.2.
16. **IF** the project has a GWMP, **THEN** enter the applicable Section number(s) and Page number(s) to their respective data fields. **IF** the project does not have a GWMP, **THEN** enter a Description of the process that will be used to comply with OSWDF size and form requirements, to the Description text field. **IF** the GWMP or the Description text field does not contain adequate detail, **THEN** attach supplementary information to the Supplementary Information data field. Note: See WAC IP Table 3.4.
17. Select from the menu the type of container that will be used to stage the waste. **IF** staging containers will not be used, **THEN** select NA from the menu.
18. Select from the menu the type of container that will be used to package the waste for transfer to the OSWDF. The conveyance is considered a package type when wastes will be transferred in bulk (e.g., articulating dump truck). Note: Packages must comply with DOT regulations or an ESL issued under the PORTS TSD. Note: See WAC IP Table 3.5.
19. **IF** the project has a GWMP, **THEN** enter the applicable Section number(s) and Page number(s) to their respective data fields. **IF** the project does not have a GWMP, **THEN** enter packaging instructions for the waste stream to the Description text field. **IF** the GWMP or the Description text field does not contain adequate detail, **THEN** attach supplementary information to the Supplementary Information data field.
20. Select from the menu the type of conveyance that will be used to transfer the waste to the OSWDF. **IF** the conveyance is also the package, **THEN** select "Same as Package" from the menu. (See item 18 above).
21. **IF** the project has a GWMP, **THEN** enter the applicable Section number(s) and Page number(s) to their respective data fields. **IF** the project does not have a GWMP, **THEN** enter transportation instructions for the waste stream to the Description text field. **IF** the GWMP or the Description text field does not contain adequate detail, **THEN** attach supplementary information to the Supplementary Information data field. If the waste will be transported under an ESL instead of full DOT compliance, enter the ESL number (when available). Note: See WAC IP Table 3.7.
22. Special Considerations:

    For all applicable items:

    IF the project has a GWMP, **THEN** enter the applicable Section number(s) and Page number(s) to their respective data fields. **IF** the project does not have a GWMP, **THEN** enter any special handling requirements to the Description text field. **IF** the GWMP or the Description text field does not contain adequate detail, **THEN** attach additional information to the Supplementary Information data field.

    For item c, also attach the criticality incredible determination.

Instructions (Continued)

Section B. Table of Anticipated OSWDF-Bound Waste Streams (Continued)

Provide the following information for each waste stream.

For item d, IF the waste stream was not included in the original OSWDF Hazards Analysis, **THEN** also attach the analysis.
For item e, **IF** the waste stream falls outside the OSWDF PA bounding parameters, **THEN** also attach the determination of "no impact".

Section C. Table of Anticipated Off-Site Waste Streams

Provide the following information for each waste stream.

23. Enter a description of the waste stream in text box.
24. Enter numerical value of the planned waste stream volume in data entry field. Select unit from menu.
25. Enter container tracking numbers. This update should be made when containers for the waste stream are received from the Waste Management organization.
26. Enter numerical value of the actual waste volume in data entry field. Select unit from menu. This update should be made when filled containers are transferred from the project location to the Waste Management organization (i.e., before repackaged or co-packaged for off-site shipment).
27. Select the planned off-site facility from the menu.
28. Select the actual off-site facility from the menu. This update should be made when the containers (or the waste that they contained) are shipped off-site by the Waste Management organization.

Section D. Approvals

29. Project Representative PPC Certification:
    a. Select from menu.
    b. Apply digital signature.
    c. Assigned by the WISE database.
30. WAO Project Representative PPC Verification:
    a. Select from menu.
    b. Apply digital signature.
    c. Assigned by the WISE database.
